Art Unit: 3742

The amendment filed 10/19/10 is acknowledged. Claims 1-15 remain pending.

With respect to Applicant's query of the objection to Drawings in the previous Office action, Applicant's attention is directed to the "Office Action Summary," which specifies at the bottom of the page, under "Attachments," item #6, that the drawings are objected to for being informal.

### ***Claim Rejections - 35 USC § 112***

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 9 of the marked-up claims, states that "each heating plate is attached to the base in one exclusively continuous partial area that is smaller than the remaining surface of the heating plate."

Although the response filed 10/19/10 identifies the "continuous partial area" of attachment as the area of contact between the heating plate and the flange of the attachment means, this area is not otherwise distinguished, in the claims or specification, from the area of contact between the heating plate and the "base" to which the heating plate is attached, which in Figure 1 also appears to satisfy the recited inequality.

This "continuous area" should be expressly identified as the area of contact between a surface of the heating plate and the attachment means.

### ***Allowable Subject Matter***

Claim 1-15 would appear to be allowable if amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

### ***Response to Arguments***

Applicant's arguments filed 10/19/10 have been fully considered but they are not persuasive. As discussed above, the "continuous partial area" of attachment is not identified with the area of contact between the heating plate and the flange of the attachment means, which is the area contemplated by Applicant. This area is not clearly distinguished from an area of contact between the heating plate and the "base" to which the heating plate is attached.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3742

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
